OBJECTIVE

Aspiring **Software Development Engineer (SDE)** with a focus on **Full Stack** and **Backend Development**. Passionate about building interactive user experiences.

EDUCATION

Indian Institute of Information Technology, Manipur Manipur, India
Bachelor of Technology in Computer Science and Engineering; CGPA: 7.46 2022 – 2026

EXPERIENCE

Full-Stack Developer Intern Remote
Satvify Jan 2026 – May 2026

- Engineered a comprehensive e-commerce platform using **React.js, Node.js, Express.js, and PostgreSQL**, delivering a seamless shopping experience for healthy and vegan products.
- Integrated **Razorpay** for secure payment processing and deployed the scalable architecture on **AWS**.

Intern Developer Remote
MBSGames May 2025 – July 2025

- Developed core gameplay mechanics for 'Tiny Toads,' an educational mobile game, utilizing **Unity and C#** to enhance user engagement and learning outcomes.
- Engineered interactive learning modules (alphabet drawing, number counting) and optimized performance, resulting in a smoother user experience on low-end devices.

PROJECTS

Course Directory — [Live Demo](#) — *Express.js, ejs, Node.js, MongoDB* Jan 2025 – Feb 2025

- Architected a full-stack educational platform using Node.js, Express.js, and MongoDB (Mongoose) with an EJS and Bootstrap 5 frontend to centralize university course management.
- Implemented secure user authentication and Role-Based Access Control using Passport.js and bcrypt, enabling admins to manage curriculum while students access materials.
- Integrated Cloudinary cloud storage via Multer to securely process and host permanent uploads of lecture PDFs and assignment files, optimizing server storage.

Real-Time Chat Application | *Node.js, Express.js, Socket.io* 2025

- Real-time chat application supporting multiple users and private messaging.
- Integrated WebSockets for real-time communication and authentication for secure login.

Network Scheduling Algorithm Visualizer | *C++, Qt Framework* Aug 2024 – Oct 2024

- Designed and implemented an interactive visualization tool for 5 network scheduling algorithms.
- Enabled real-time simulation where users can input the number of packets, time sequences, and output flow rate, dynamically visualizing the algorithm's behavior.

TECHNICAL SKILLS

Languages: C/C++, JavaScript
Frameworks & Libraries: Node.js, Express.js, Bootstrap, Tailwind CSS
Databases: MySQL, PostgreSQL, SQL/NoSQL Design
Developer Tools: Git, GitHub, VS Code, npm, Postman
Cloud & Deployment: Render

RELEVANT COURSEWORK

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Database Management Systems, Compiler Design
AI & ML: Artificial Intelligence, Machine Learning, Natural Language Processing, Information Retrieval
Systems & Security: Cloud Computing, Cyber Security, Cryptography, Internet of Things (IoT)

CERTIFICATIONS & LEADERSHIP

Web Development Bootcamp - Udemy (Mar 2024) — 65-hour full-stack development training.
Team Lead - Smart India Hackathon 2024 (Aug 2024) — Led 6-person development team using Agile/Scrum.
Problem Solving — Solved 500+ coding problems on HackerRank and LeetCode.
Ethical Hacking and Penetration Testing - C-DAC NOIDA (Dec 2024 – Jan 2025) — Completed online training & virtual internship under Cyber Gyan Project.
